Bellevue with Panorama technology won the “MIG Longarone Fiere Innovation” prize

The **Bellevue** display table with **Panorama technology** won the “MIG Longarone Fiere Innovation” first prize, awarded each year at MIG (the International Artisan Gelato exhibition) to products connected to artisan gelato-making that are recognised as technologically original and innovative. The reason for the prize was presented by Paolo Diana, chairman of the jury, who explained that Bellevue was an interesting innovation “with a functional update with various positive areas of performances that make it possible to combine the excellent preservation of pozzetti counters with better visibility of horizontal display cases”. It was the first in a long series of prizes for Bellevue.
